| Berkeley, CA | (510) 493-5919 | buenojacob7@berkeley.edu | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) |

Education

University of California, Berkeley

May 2026

B.A. Data Science with emphasis in Business & Industrial Analytics

- **Relevant Coursework:** Structure & Interpretation of Computer Programs, Data Structures and Algorithms, Foundations of Data Science, Linear Algebra & Differential Equations, Discrete Math and Probability, Techniques and Principles of Data Science, Intro to Artificial Intelligence, Probability for Data Science, Data Mining & Analytics, Healthcare Analytics, Data Engineering

Skills

Languages: Python, SQL, R, Java, HTML/CSS, Javascript, C#

Libraries/Software: Pandas, Starburst, AWS Sagemaker, DataVisor, Seaborn, Matplotlib, Scikit-Learn, PyTorch, Tableau, Excel, NumPy, React, Git, MongoDB, NodeJS, FireBase

Techniques/Tools: Linear Regression, NoSQL, Logistic Regression, Clustering, Data Analytics, Data Modeling, Data Visualization, Machine Learning, Database Management, Computer Vision, Probability/Statistics, Deep Neural Networks, Deep Learning, Reinforcement Learning

Highlighted Experience and Projects

Risk Data Science Intern | BILL

May 2025 - Aug 2025

- Developed and executed a fraud mitigation strategy targeting CNP (Card-Not-Present) transactions involving compromised cards and accounts, reducing exposure to runaway fraud.
- Captured 150k in runaway fraud on data between January 2025 - June 2025; developed and deployed an automated monitoring dashboard to deliver real-time alerts and enhance fraud detection.
- Engineered features indicative of fraud and developed and optimized complex SQL queries to extract, join, and analyze data across large relational databases.
- Utilized Datavisor to design and implement rule-based models and engineer new features for detecting and mitigating CNP runaway fraud, enhancing real-time risk prevention and risk management.

Data Analyst Intern | UC Berkeley Executive Education

Aug 2024 - May 2025

- Designed and implemented a data pipeline that ingests educational survey data, preprocesses it into a visualization-ready format, and generates comprehensive reports from the transformed data.
- Streamlined report generation by building a scalable pipeline, reducing manual effort by approximately 3 hours per report and significantly improving reporting efficiency.

Student Data Analyst | UC Berkeley Haas School of Business

May 2024 - Aug 2024

- Analyzed and visualized financial data and which enabled the finance department to make data-driven decisions to use funds efficiently and effectively. Used Tableau and Jupyter Notebooks to perform analysis.
- Performed data preprocessing and exploratory data analysis using Pandas to accurately utilize and transform financial and admissions data which resulted in clear data reports.

Code Coach | The Coder School, Berkeley

Sept 2022 - Dec 2022

- Taught and tutored adolescents from ages 6-17 how to code through project based learning with skill levels ranging from Scratch to Python and even Java.
- This resulted in students effectively enhancing their programming skill sets by producing beautiful games and projects with my guidance.

Leadership and Extracurricular Activities

Pioneers in Engineering - Director of Software | UC Berkeley Organization

Aug 2023 - Present

- A student-run, non-profit organization on campus that is devoted to teaching underrepresented high school students about coding and robotics through robotics competitions between multiple schools.
- Oversaw all software teams within the organization, providing technical leadership, coordinating cross-team collaboration, and guiding the development of projects

Google Developer Student Club, UC Berkeley Branch - Leadership | UC Berkeley Organization

Jan 2023 - Present

- A student-run organization on campus that aims to teach programming foundations to students through workshops and lectures, our main mission is to expand outreach of Computer Science to beginners.
